Unit Inspection Findings

During the unit inspection, the following issues were noted:

1. Ceiling fans are dirty and require cleaning.
2. Refrigerator is dirty and should be cleaned thoroughly.
3. Air conditioner has not been serviced and requires maintenance.
4. Floors are dirty and need proper cleaning.
5. The toilet floor drain/water discharge hole cover is not properly closed and should be fixed to ensure it is securely fitted.

Kindly arrange for the necessary cleaning and repairs before handing over the unit.
